

PL SERIES

NEW PRODUCT

PORTLIGHTS

Keep it low Ultra slim portlights

New product by VETUS: ultra slim portlights suitable for panel thicknesses of 2 - 20 mm.

The port is so flush that it resembles fritted glass and is also suitable to be fitted in fritted glass: meet the PL series! A very shallow aluminium edge combined with the clamping mechanism ensures a very low profile portlight even when fitted in glass itself. Like all VETUS items, the PL series is thoroughly tested and is CE approved for use in A1 locations. To top it all off: all PL portlights are fitted with the new ergonomic PPL2 knobs and are supplied as standard with a removable mosquito screen.

Shallow never sounded this positive – the VETUS PL series

The inside of the clamping profile can be finished with the supplied trim. All PL portlights come in fashionable satin-black coated aluminium with tinted acrylic for that premium look. The complete series consists of 5 different models and are available from stock.

Highlighted

- Satin black powder coated aluminium
- A1 CE approved
- 10 mm thick 'dark smoke' acrylic
- Clamping system suitable for 2 to 20 mm wall thicknesses
- Internal trim and removable mosquito included
- Mitered corners
