### Twin coil calorifiers - WHT series

#### Warmth on request

VETUS heats up the calorifier scene. Meet the WHT series!

With the WHT calorifier series, VETUS adds a new meaning to 'Double Dutch': this twin coiled calorifier range will double your level on comfort on board when it comes to warm water. Another feature next to the double coil is the electric element. The WHT series uses this electric heating element to heat the water when the engine is not running, as alternative to the spiral tube which uses the surplus warmth of the running engine. Warm water at your disposal - anytime, anywhere.

#### Double coiled WHT calorifiers – your personal hot spring on board

The WHT twin coil calorifier series is unique in its (price) class with its additional electric element as standard: an option normally only found on far more expensive calorifiers. The calorifier is supplied with a complete connection kit: hose pillars, T-shaped connector, check valve and pressure relief valve. Available in four sizes from stock right now.

#### Unique features

- Twin coil to heat water (either by engine or by heating system) as well as an extra electric element (1,5kW) (3-way heating)
- Duplex stainless steel tank
- Standard with pressure release valve
- Meets all applicable approvals in boating
- Available in 4 sizes: 25, 50, 75 and 100 litre

SPECIFICATIONS	WHT025	WHT050	WHT075	WHT100
Fresh water capacity (l)	25	50	75	100
Coolant capacity (l)		0,5		
Outer diameter (mm)		480		
Outer length (mm)	452	620	852	1052
Tank material	Duplex Stainless steel			
Engine coolant connection	G 1/2			
On-board heating system connection	G 1/2			
Fresh water connection	G 1/2			
Heating element connection	G 1 1/4			
Pressure relief valve setting	4 bar (56 lbs / square inch)
